COUNTRY
BLINDS CURTAINS & SHUTTERS

PINNACLE. THE HIGH POINT OF WINDOW FASHION.

Welcome to pure prestige in a true solid timber design that delivers performance and functionality with stunning good looks. The Paulownia hardwood that we select for our Pinnacle design is remarkably strong and stable, staying true and resisting the warping and twisting that can be a problem with inferior timbers.

Forget about timber veneer shutters – Pinnacle is pure, solid Paulownia, incorporating reverse-grain laminating technology. This technique delivers the rigidity to help you widen your scope, spanning widths of up to 1,100 millimetres without sagging. Enjoy the freedom to create clean looks with just one panel instead of two - only Pinnacle can do this in solid timber.

As practical as they are fashionable, Pinnacle plantation shutters are finished in the same 2-pack polyurethane often seen in high end kitchens, so cleaning is easy and durability is a given.

Pinnacle plantation shutters by Country. In the home you love, don't compromise. Start at the top.

ENTICE. RIGID DESIGN, FLEXIBLE FINISH.

The Entice plantation shutter range is a hybrid of aluminium and PVC. The frame blades incorporate a rigid aluminium core that eliminates sag, helping you to span wide windows without gravity spoiling the effect. Durable, lightweight and beautiful, the PVC composite design of Entice delivers premium looks and functionality at a very agreeable price.

For those who love to embrace the freedom that comes with colour-matching or contrasting, Country offers Entice plantation shutters in a range of premium 2-pack painted finishes to suit virtually every interior décor idea...so let's get creative together.

DRIFT. A TRULY UNIQUE TIMBER FINISH.

The Drift design brings something special to plantation shutters, distinguished by a texture you'll just have to touch... the same texture seen on those rare, beautiful pieces of weather-hewn timber found on secluded shorelines.

Drift is a different approach to the same premium quality Paulownia hardwood that features in our Pinnacle range. A favourite timber with vintage surfboard makers, Paulownia is as tough as it is beautiful, perfectly suited for our harsh environment. Explore Country's choice of colours, stains and washes, and don't be surprised if your mind starts to wander as you consider the feature potential that Drift plantation shutters can bring to your living space.

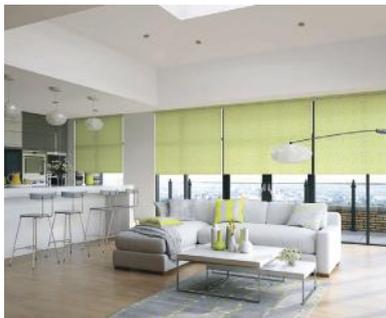

ENDURE. THINK OUTSIDE.

For everything that our tough Australian summers and winters can serve up, the answer is Endure. Country's Endure plantation shutter range is designed to weather every season outside your home and look amazing doing it.

Every Endure component is rigid, impervious aluminium, the same type of material trusted by the aerospace industry to reliably perform in every condition imaginable. Frame and blades are all coated in a smooth, automotive finish that won't flake or chip. Colours? There are plenty, so just ask. Endure can tame the wind around your outdoor living areas and deliver privacy, too. But with amazing sleek looks, why keep it all outside? Endure is the perfect solution, outdoors or in.

DON'T STOP AT THE SHUTTERS! COUNTRY IS YOUR CONNECTION FOR BEAUTIFUL, CUSTOM-MADE BLINDS AND SO MUCH MORE.

Roller Blinds

Dual Roller Blinds

Roman Blinds
