

## The Country Blinds advantages

### Double splines and a weld of difference

At Country, we've invested in the finest technology from Germany and the U.S.A so that we can incorporate fully fabric-welded construction into our Ziptrak blinds. Stitching can break down in sunlight or rot when exposed to moisture – welding stays as strong as the parent material.

Manufactured on a computer-controlled cutting table, our blinds are cut precisely to the millimetre. Patented side-spline technology, welded on both sides, is made using UV-stabilised Kadar that won't fail or fade. Our continuous splines cannot get stuck or break like a spiral zipper can, so you can expect years of reliable operation without old-fashioned zipper frustration.

### Spring action, easy locking and complete convenience

Ziptrak's by Country are operated using a neat, simple spring mechanism, because crank handles belong on vintage cars, not blinds.

With the blind lowered, a middle lock means you can easily lock and unlock the blind from the centre, without crossing to the other side like old-fashioned designs, so you can raise it in no time.

### A better-looking blind with more options open to you

Blinds should look great however you use them. Ziptrak's by Country have fabric extending from the top roller to the bottom bar without any coloured spline, so there's no chance of a broken line at eye level when blinds are left partially down.

'Reducers' on the top tube mean less build-up of the spline at the edge of the blind, so the appearance is always flat, neat and streamlined.

Our Ziptrak's can be left part way open with no need to use locks – the spring-balanced system takes care of everything.

### Wider, neater, motorised...and voice-controlled!

We make our own Ziptrak's, and our access to super-wide fabrics means we can create even the widest blinds with no unsightly joins. Colour-coded fixings, right down to the rivets, deliver a professional finish to the last detail, and protect against corrosion, too.

Finally, Country Blinds specialize in motorisation, so you can use switched, remote-controlled, smartphone or even voice activation. Make the most of Amazon Alexa or Google Home – you're in control!

## The Country Blinds difference

### Trusted through time

Three decades in business has earned Country Blinds the trust of home and business owners all over South Australia. Every year, word-of-mouth recommendations from happy Country customers mean our reputation for excellence in products and service just keeps growing.

### We make it, we install it.

Country Blinds is a family-owned, factory-direct supplier, manufacturing in our Adelaide Hills factory and installing all over the state with no compromises. That means our own installers take care of every single job. Because we make and install everything ourselves, we stand behind our products and our workmanship.

### Value

Real value comes from a business with the ability to create a bespoke product tailored to your own home, perfectly suited to your décor and lifestyle. When it comes to your home, 'off-the-rack' is often just another way of saying 'compromise'. We never compromise on value and there is nothing 'off-the-rack' about our products or quality.

### Locally owned and operated

We don't just have showrooms...we have a factory. When you deal with Country you can be confident that every single step, from manufacturing to installation, can be traced back to one place, one name, right here in South Australia. There are no third parties, just first-rate products and service by people who live right here.

## There's more!

Thanks for taking the time to understand the many factors that set Country Blinds apart. It's worth noting that we make and install more than Ziptrak Outdoor Blinds - in fact Country proudly manufactures an enormous range of interior and exterior window furnishings to suit all styles of home.
